Summary

Final-year B.Tech Electronics and Computer Science student focused on Java software development. Experienced in building and deploying full-stack applications using Java, Spring Boot, React.js, PostgreSQL, REST APIs, and Object-Oriented Programming, with strong Data Structures and Algorithms fundamentals.

Education

Techno Main Salt Lake, Kolkata 2023–2027
B.Tech in Electronics and Computer Science | CGPA: 7.37

Premier Academy, Muzaffarpur 2023
Class XII | 71.4%

Anand Prep Public School, Muzaffarpur 2021
Class X | 84%

Technical Skills

Languages: Java, C, Python, JavaScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Node.js, Express.js, REST APIs, JWT

Frontend & Databases: React.js, HTML5, CSS3, PostgreSQL, MySQL, MongoDB

AI/ML: Scikit-learn, Pandas, NumPy, Matplotlib, Plotly, K-Means Clustering, Exploratory Data Analysis

Tools & Core CS: Maven, Docker, Swagger/OpenAPI, Git, GitHub, Render, Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

PulseGuard – API Monitoring Platform *Java, Spring Boot*

Tech Stack: Spring Boot, React.js, PostgreSQL, Spring Security, JWT, JPA/Hibernate, Docker, Swagger, Render

- Developed and deployed a full-stack platform that performs scheduled and concurrent API health checks to track availability, HTTP status codes, and response latency.
- Implemented automatic incident detection and rule-based diagnosis for server errors, connection failures, rate limiting, and latency anomalies.
- Secured REST APIs using JWT authentication, persisted monitoring data in PostgreSQL, and built a responsive React dashboard with automatic updates.

AI-Based Voice Assistant *Python, AI*

Tech Stack: Python, Speech Recognition, pyttsx3, CustomTkinter, AI API

- Developed a desktop AI voice assistant using speech recognition and text-to-speech for conversational interaction and system automation.
- Integrated an AI API to generate responses and execute operations including application launching, web search, battery monitoring, shutdown, and restart.

Achievements & Activities

- Solved **200+ Data Structures and Algorithms problems** on LeetCode using Java and earned the 100 Days Badge 2026.
- Served as Team Lead for Smart India Hackathon (SIH) 2025.
- Completed training in Data Science, Machine Learning, and Business Intelligence, and earned a Diploma in Computer Application.
