Summary

Final-year B.Tech Electronics Computer Science student skilled in Java, Python, JavaScript, Data Structures Algorithms, and Object-Oriented Programming. Experienced in developing AI-based applications, full-stack projects, and system-level solutions, with hands-on exposure to databases, REST APIs, and software development. Strong problem-solving and analytical skills with a focus on writing clean, maintainable, and efficient code.

Education

Techno Main Salt Lake, Kolkata B.Tech in Electronics and Computer Science CGPA: 7.37	2023 - 2027
Premier Academy ,Muzaffarpur Class XII Percentage: 71.4	2023
Anand Prep Public School, Muzaffarpur Class X Percentage: 84	2021

Technical Skills

- **Languages:** Java, C, Python, JavaScript, SQL
- **AI/ML:** Scikit-learn, Pandas, NumPy, Matplotlib, Plotly, K-Means Clustering, Decision Tree Regression, Exploratory Data Analysis
- **JS Frameworks & Web:** React.js, Node.js, Express.js, HTML5, CSS3, REST APIs
- **Databases:** MySQL, SQL, MongoDB
- **Tools & Platforms:** VS Code, Vercel, Render, Streamlit, Claude, Cursor, Cloudinary, Git & GitHub
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Software Engineering

Projects

AI-Based Voice Assistant | Python & AI

Tech Stack: Python, Speech Recognition, pyttsx3, CustomTkinter, AI API

- Developed a desktop-based AI voice assistant using speech recognition and text-to-speech for conversational interaction and automated system operations.
- Integrated an AI API to generate conversational responses and execute system-level tasks including application launching, web search, battery status monitoring, shutdown, and restart.
- Designed an interactive graphical user interface using CustomTkinter to provide a user-friendly experience for voice-based interaction and task execution.

Banking Management System | Java & Object-Oriented Programming

Tech Stack: Java, OOP, HashMap, Collections

- Developed a console-based banking management application supporting account creation, deposits, withdrawals, and balance inquiries.
- Implemented account and transaction management using Java Object-Oriented Programming principles, including classes, objects, encapsulation, and modular design.
- Used HashMap-based storage for efficient account lookup and management, strengthening practical understanding of Java Collections and data handling.

Achievements & Activities

- Solved **200+ DSA** problems on LeetCode using Java, earning the 100 Days Badge 2026.
- Team Lead-Smart India Hackathon (SIH) 2025.
- Completed professional training and technical workshops in Data Science, Machine Learning, and Business Intelligence, gaining practical exposure to SQL, data analysis, predictive analytics, and data-driven problem solving. Earned a Diploma in Computer Application (DCA) certification, strengthening foundational skills in computer applications and software tools.
